BLOOD PRESSURE METERS

Who will benefit the most from owning a BP meter?

Anyone diagnosed with high blood pressure

Individuals on high blood pressure medications

Individuals with risk factors for high blood pressure and its related conditions.

Pregnant women experiencing pregnancyinduced high blood pressure.

People who only have high readings at the doctor's office ("white coat" hypertension).

People who only have high readings at home but not at the doctor's office ("masked" hypertension).

Factors to consider when choosing a Blood Pressure Monitor

Choose an automatic, cuff-style, arm monitor. Type:

Measure your upper arm circumference to get a cuff that fits! A fitting Cuff Size: cuff size helps to ensure more accurate readings.

Choose a monitor that comes with a power adapter if you are Power Source: concerned about battery running out quickly.

Display Window: Reading should be large and bright

Cost: Choose a monitor that is within your budget!

Some blood pressure meters can to connect to a smartphone for

Who can you ask for further information on blood pressure monitoring devices?

Your pharmacist can further advise you on choosing the appropriate blood pressure monitoring device, how to interpret the readings and direct you to medical care if needed!
